

**Weekly Update**  
**Apalachicola City Water**  
**November 21<sup>st</sup>, 2025**

**Progress:**

Wells #6 and 7 are operational. Minor upgrades to Well #5 continue.

The aerator/scrubber installation phase continues and is moving along well.

**City Water Sample Test Results**

- Apalachicola city water quality test results meet state and federal drinking water standards.
- **Daily residual chlorine\*** (November 15<sup>th</sup> through November 21<sup>st</sup>, 2025):
  - At the plant, levels ranged from 1.95 - 3.67 ppm.
  - At the remote location, levels ranged from 0.25 - 1.56 ppm.

---

\*Residual chlorine is the amount of chlorine that remains in the water after treatment at the drinking water plant. Chlorine reacts with organic material and hydrogen sulfide as it travels down the water distribution system—so chlorine levels decrease with increased distance from the plant. This decrease is normal for every water treatment system. *State regulations say that chlorine levels cannot be above 4 ppm, or below 0.20 ppm. **Levels above 4 ppm exceed the EPA Maximum Contaminant Level (MCL). Levels at or above 0.2 ppm indicate there is enough chlorine to kill bacteria.***
